Three River Communications maintains storage batteries designed to provide a minimum reserve capacity consistent with RUS TE&CM 1751E-302, Power Requirements for Digital Central Office Equipment. 1751E-302 paragraph 2.3.4 recommends a minimum reserve capacity of 8 hours, or 3 hours if the central office is equipped with an emergency standby generator. This is consistent with Title 291, NPSC Telecommunications Rules and Regulations, Chapter 5, paragraph 002.05 Emergency Operations and Power.
    - 3.1.2. Three River Communications maintains a dedicated standby generator fueled with a 1000 gallon reserve supply of liquid propane gas (LPG). The standby unit is equipped with an automatic transfer switch so that in the event of an interruption of the commercial electric power lasting more than a few minutes, the standby generator starts automatically and provides electrical power to the central office equipment, air conditioning and building lighting. The automatic transfer switch also exercises the standby unit

periodically and an alarm indication is sent if the standby generator does not start so that telecommunications personnel can perform proactive maintenance.

#### 3.2. Remote Equipment Cabinets

3.2.1. Where electronic equipment in cabinets located remotely from the central office, is used to provide service, the cabinets are equipped with batteries designed to operate for a minimum of eight hours without commercial electrical power. In addition, TRC maintains portable AC standby generators for use in the event of prolonged commercial power interruptions and the cabinets are equipped with external receptacles to facilitate connection to portable generators.

#### 4. Rerouting Traffic around Damaged Facilities

4.1. In the event of damage to cable facilities owned by Three River Communications, our maintenance personnel would restore service using emergency splice kits kept on hand for these types of service disruptions. If the damaged facilities are not owned by Three River Communications we would work with the carrier directly affected to identify the source of disruption and the estimated amount of time before service is restored.

4.2. In the event of an extended outage, contact would be made with another service provider which has a separate, physical cable connection with TRC to provision temporary alternate routes supporting originating and terminating toll calls. Emphasis would first be placed on establishing connections to nearby PSAP, law-enforcement and emergency services.

## Three River Communications

### Ability to Remain Functional in Emergency Situations

- 5.1. Three River Communications meets Title 291, NPSC Telecommunications Rules and Regulations, Chapter 5, paragraph 002.12 Dial Service Objectives for sufficient central office capacity and equipment during the "...average busy hour-busy season..."
- 5.2. Three River Communications follows applicable RUS practices 522 and 322 when specifying, administrating, and assigning facilities within its control (as opposed to facilities ordered by connecting interexchange carriers).
- 5.3. The Ainsworth central office switch is a Genband DMS-10 operating at the 602.20 software release. The Ainsworth DMS-10 is equipped with 875 access lines. The DMS-10 is designed to support up to 12,000 access lines by adding line and trunk interface equipment and network equipment only. In its current configuration the Ainsworth DMS-10 has additional capacity over and above the minimums specified to meet NPSC and RUS guidelines.
- 5.4. When traffic volumes greatly exceed specified criteria and additional capacity of the switch or connecting facilities, the DMS-10 continues to process calls but with potentially longer waiting times for dial tone, higher post-dialing delays and a higher probability of callers receiving all trunks busy indications (fast busy) and having to redial calls. Depending on the magnitude and duration of extreme peak demand, TRC would examine alternatives such as provisioning additional facilities and work with connecting carriers to expedite additional capacity.
